12 Klein Drakenstein Road, Cape Town, South Africa, 7646

PROFESSIONAL SUMMARY

- Detail-oriented Front-End Engineer with 4+ years of experience developing responsive web and mobile applications using JavaScript, TypeScript, React, and React Native. Strong background in building modern user interfaces using HTML5, CSS3, and component-based front-end frameworks.
- Experienced working extensively with WordPress in a FinTech environment, supporting and enhancing client websites built with Elementor and custom front-end components. Skilled in troubleshooting UI issues, implementing front-end enhancements, and ensuring consistent performance and usability across client platforms.
- In a second-line support role, manage client cases submitted through Salesforce by analysing issues, creating Jira tickets, implementing and testing fixes, and communicating results directly with clients. Regularly collaborate with international teams and clients across the US, Europe, the UK, Netherlands, and Canada, providing both technical solutions and client-friendly support.
- Strong communicator who bridges the gap between technical teams and clients while maintaining a focus on delivering reliable, high-quality user experiences.

WORK EXPERIENCE

Front End Developer

Mar 2026 - Present

Databalk • Cape Town, South Africa

- Responsible for developing and maintaining responsive, high-quality front-end interfaces for DataBalk platforms and internal systems.
- Builds reusable components and UI elements using modern JavaScript/TypeScript frameworks (e.g., React).
- Integrates front-end solutions with Microsoft 365 services, including SharePoint, Teams, Viva Connections, and APIs.

- Supports creation of dashboards and visual components for employee, HR, and certification reporting.
- Collaborates with back-end developers, HR, and business stakeholders to deliver functional and user-friendly solutions.
- Ensures front-end performance, accessibility, and cross-device compatibility across all applications.
- Participates in code reviews, documentation, and continuous improvement of development processes.

Front-End Engineer

Sep 2022 - Dec 2025

Kurtosys Systems • Cape Town, South Africa

- Developed and maintained responsive **WordPress-based financial websites and web applications** using **HTML5, CSS3, JavaScript, and React**, ensuring consistent performance and user experience across devices.
- Implemented and enhanced front-end functionality for client websites built with **WordPress and Elementor**, troubleshooting UI issues and delivering user interface improvements.
- Collaborated with international clients across the **US, Europe, Canada, and the UK**, gathering requirements, discussing technical solutions, and translating complex technical concepts into clear, client-friendly explanations.
- Investigated and resolved **second-line support cases** raised through **Salesforce**, converting issues into **Jira tickets**, implementing front-end fixes, and validating solutions in staging environments before release.
- Diagnosed and resolved **UI and layout issues across multiple WordPress client platforms**, improving stability, accessibility, and overall user experience.
- Worked within **Agile and Kanban teams**, participating in stand-ups, sprint planning, and retrospectives to support continuous delivery and process improvement.
- Partnered with **QA engineers** to support automated testing by writing logic and selectors that reliably target critical elements within web pages.

Junior Fullstack Developer

Jan 2022 - May 2022

Ucook • Cape Town, South Africa

- Contributed primarily to **front-end development** of a food-tech platform, building responsive user interfaces using **React.js, JavaScript, HTML5, and CSS3**.

- Integrated front-end components with **RESTful APIs**, ensuring seamless communication between the UI and backend services.
- Collaborated closely with the **CTO and development team** to troubleshoot issues, review code, and maintain application stability.
- Assisted with **backend development tasks** using **Node.js and MongoDB** to support feature implementation and platform functionality.
- Wrote **unit and integration tests** and debugged application issues to improve reliability and performance.
- Worked within a **Kanban development environment**, participating in task refinement and delivering incremental product improvements.

Web Developer

Jan 2021 - Oct 2022

Eat Creative Africa • Cape Town, South Africa

- Served as the primary **front-end developer** responsible for building and maintaining multiple **WordPress-based e-commerce websites**.
- Translated **UI/UX design mockups** into responsive and interactive user interfaces using **HTML5, CSS3, JavaScript, React.js, and CSS modules**.
- Implemented and customized **WordPress and WooCommerce functionality**, ensuring seamless integration between the CMS and front-end components.
- Developed **custom front-end scripts and UI enhancements** to support client-specific business requirements and improve overall user experience.
- Ensured **responsive design and cross-browser compatibility**, delivering consistent performance across desktop and mobile devices.
- Collaborated directly with **clients and stakeholders** to gather requirements, refine project scope, and deliver high-quality web solutions.

Frontend Web Developer

Jun 2019 - Sep 2019

Next Steps Digital • Cape Town, South Africa

- Built responsive websites using **HTML5, CSS3, and JavaScript**, transforming design concepts into production-ready web interfaces.
- Implemented **mobile-first layouts** to ensure optimal usability across a wide range of devices and screen sizes.
- Collaborated with **backend developers** to integrate CMS-driven content and ensure smooth functionality across the platform.
- Performed **website maintenance, bug fixes, and UI enhancements** to support ongoing client requirements and improve user experience.

EDUCATION

Certificate of IEP completion programs (College/CEGEP)

2020 - 2021

IT Academy (a division of IT SA Computer Services & Solutions) • Cape Town, South Africa

- Completed a comprehensive Software Development program focused on both front-end and back-end technologies.
- Gained hands-on experience in **web development**, including HTML5, CSS3, JavaScript, and responsive design.
- Developed cross-platform **mobile applications** using UWP and learned advanced mobile features such as app lifecycle, touch input, speech integration, and notifications.
- Built a strong foundation in **Object-Oriented Programming (OOP)** using both **C#** and **Java**, with projects involving inheritance, encapsulation, polymorphism, and interface-based design.
- Studied **cloud computing technologies**, earning certifications in **AWS (Developer Associate)** and **Microsoft Azure** (including AZ-204, AZ-400, AZ-900).
- Covered key DevOps concepts such as CI/CD, infrastructure as code, secure deployments, and serverless application development.
- Developed a versatile technical skillset suitable for modern software engineering environments across web, mobile, and cloud platforms.

Professional Diploma in Web Development

Oct 2018 - Mar 2019

Shaw Academy • Paarl, South Africa

- Completed EQF Level 5 Professional Diploma with **Distinction**.
- Covered advanced HTML5, CSS3, JavaScript, responsive design, and UI/UX best practices.
- Built multiple real-world projects, including dynamic web pages, single-page applications, and RESTful API integrations.
- Gained hands-on experience with version control (Git), deployment workflows, and testing methodologies.

High school/secondary diploma programs, other (College/CEGEP)

2014 - Dec 2016

Noorder Paarl High School • Paarl, South Africa

- Achieved National Senior Certificate with admission to diploma or higher certificate studies.
- Key subjects: English Home Language, Afrikaans First Additional Language, Mathematics, Life Sciences, Geography, History.
- Developed strong analytical, research, and written communication skills through project work and examinations.
- Active in extracurriculars: Member of the school's music and sports clubs such as football, fostering teamwork and leadership.

SKILLS

Frontend Development

- JavaScript (ES6+), TypeScript, HTML5, CSS3, React.js, React Native, Styled Components, Sass, responsive design, component-based architecture, modern UI development

WordPress Development

- WordPress, Elementor, WooCommerce, front-end customization, UI troubleshooting, content-driven website development

Frontend Architecture & Web Technologies

- Single Page Applications (SPAs), REST API integration, state management concepts, front-end performance optimization, cross-browser compatibility, mobile-first development

Mobile Development

- React Native, Expo, cross-platform mobile application development, mobile UI/UX optimization

Backend Exposure

- Node.js, Express.js, GraphQL, MongoDB

Testing & Debugging

- Unit testing, integration testing, browser debugging tools, troubleshooting front-end issues

Tools & Platforms

- Git, GitHub, Bitbucket, Visual Studio Code, Postman, Jira, Agile & Kanban workflows

Design & UI Collaboration

- Figma, Adobe XD, UI component libraries (Tailwind CSS, Bootstrap, Material UI)

PROFESSIONAL CREDENTIALS

Advanced WordPress Development

Career Essentials in Software Development by Microsoft and LinkedIn

Driving Change through Impactful Communication

JavaScript Debugging

Learning PC Maintenance and Performance

Programming Foundations: Fundamentals

WordPress: Action and Filter Hooks

WordPress: Advanced Custom Fields

WordPress: REST API

AWARDS AND HONOURS

HackETC Innovation Hackathon – 1st Place Winner

2018

Awarded 1st place at the **HackETC Innovation Hackathon** hosted in Cape Town by SANRAL, Electronic Toll Collection, and WhereIsMyTransport. The hackathon focused on building smart mobility solutions using real toll gantry data and the WhereIsMyTransport Public Transport API. As part of a 3-member team, we developed **UDrive**, a chatbot that helps commuters especially those without smartphones navigate transport options via SMS or WhatsApp. UDrive connected real-time traffic and toll data to recommend routes based on speed or cost, provide toll cost estimates, and notify users of traffic delays. The solution was praised for its **technical execution, real-world impact, and accessibility** to the broader public. Our team was awarded a **R20,000 cash prize** and 12 months of free API

access. This experience showcased my skills in **collaborative problem-solving, API integration, transportation innovation, and user-centric development** under a tight deadline.

KEY PROJECTS

- Developed and contributed to multiple web and mobile applications using modern front-end technologies including React, React Native, JavaScript, and TypeScript. Projects focused on building responsive user interfaces, integrating APIs, and delivering intuitive user experiences across web and mobile platforms.
- Notable work includes developing and enhancing FinTech client platforms at Kurtosys Systems, where I implemented front-end fixes, improved UI functionality, and supported multiple production websites used by international clients. Additionally built and deployed cross-platform mobile applications using React Native and Expo, focusing on performance, usability, and scalable component architecture.

FRONTEND EXPERTISE

- Specialized in building modern, responsive web interfaces using JavaScript, TypeScript, React, HTML5, and CSS3. Experienced in developing scalable component-based user interfaces, integrating REST APIs, and optimizing front-end performance across production applications.
- Strong background in diagnosing and resolving UI issues across complex client platforms, particularly within FinTech environments. Comfortable collaborating with

design, QA, and backend teams to deliver reliable, user-friendly interfaces while maintaining clean and maintainable codebases.

CLIENT SUPPORT & PRODUCTION ENGINEERING

- Extensive experience supporting production web platforms and resolving client-facing issues within a second-line support environment. Skilled at analysing client-reported problems, translating them into actionable development tasks, and delivering reliable front-end solutions.
- Regularly worked with Salesforce cases and Jira tickets to investigate UI defects, implement fixes, and validate solutions in staging environments before deployment. Experienced collaborating directly with international clients across the US, Europe, Canada, and the UK to ensure clear communication and timely resolution of technical issues.
